

PRITZKER SCHOOL OF MEDICINE

FIRST-GEN LOW INCOME (AT) PRITZKER (FLIP)

Welcome to Pritzker!

FLIP is an affinity group at Pritzker comprised of students who self-identify as first-generation college graduates and/or low-income. We recognize that embracing these identities is important to further our diversity and inclusion efforts as an institution.

Our goal is to build a community among students with these identities who are underrepresented in medicine. We also hope to advocate for these students through mentorship and increasing visibility of the unique challenges we face throughout medical school.

Past projects/events

- Distributed nation-wide survey investigating effects of SES on the medical school experience
- Student mixer
- COVID retrospective: open space for students to talk about unique stressors during the pandemic
- Used FLIP feedback to help guide institutional changes that promote inclusivity for students who identify as low SES
